Management

Harding Loevner LP (effective January 15, 2016)

Investment Objective and Strategy

The International Equity Fund seeks long-term capital appreciation through investments in equity securities of companies based outside the United States.

The fund invests primarily in companies based in developed markets outside the United States as well as in established companies in emerging and frontier markets. Harding Loevner LP, the fund's subadvisor, undertakes fundamental research in an effort to identify companies that it believes are well managed, financially sound, fast growing and strongly competitive and whose shares are under-priced relative to estimates of their value. In an effort to reduce its volatility, the fund seeks to be diversified across dimensions of geography, industry, currency and market capitalization. The fund normally holds investments across at least 10 countries.

For some funds, the investment advisor has agreed voluntarily or contractually (for at least the current fiscal year) to waive or reimburse a portion of expenses. The net expense ratio is the expense ratio minus the portion of expenses waived or reimbursed. Please see the current prospectus for additional details. The peer ratio is according to Morningstar Direct, based on each fund's Morningstar classification.

Firm History: We're Wired Differently

Homestead Funds was created over 30 years ago by the National Rural Electric Cooperative Association (NRECA), a non-profit organization whose mission is to serve electric cooperative employees. Through the creation of Homestead Funds, NRECA sought to give the employees who bring power to America's farms, factories, schools, and homes access to high-quality money management and financial services. From our early roots in rural America, we have expanded our outreach to offer equity and fixed-income strategies to **all investors**.

With a thoughtful approach to money management and a watchful eye on operating expenses, we are wired differently. **We believe our boutique style gives us a competitive advantage, setting us apart and allowing us to provide affordable, high touch client service.** The portfolio managers have deep involvement in running the strategies and extensive experience in managing asset classes through different market cycles. And as stewards of service, while we've grown in size and scope, we've always kept who we serve clearly in sight.

Morningstar rated this fund, in Morningstar's foreign large growth category, 3 stars for the Overall period out of 386 funds, 3 stars for the 10-year period out of 224 funds, 3 stars for the five-year period out of 336 funds and 4 stars for the three-year period out of 386 funds for performance month ending 9/30/24. The Morningstar Rating™ for funds, or "star rating," is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, close-end funds and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustments for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-year, five-year, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

Equity securities generally have greater price volatility than fixed-income securities. The market price of equity securities may go up or down, sometimes rapidly or unpredictably. Equity securities may decline in value due to factors affecting the issuer or equity securities markets generally. Foreign securities are subject to political, regulatory, and economic risks not present in domestic investments and may experience more extreme changes in value than securities of U.S. companies. Investing in emerging and frontier markets may be subject to greater political and economic instability, less developed securities markets, and other risks than in more developed markets.
